Case Tracking Number: 140503DSP-Port-439 **Agency:** Portage County Health and Human Services Department

Child Information (at time of incident)

Age: 1 Year Gender: Female Male

Race or Ethnicity: Caucasian

Special Needs: None

Date of Incident: May 03, 2014

Description of the incident, including the suspected cause of death, injury or egregious abuse or neglect:

On May 3, 2014, the agency received an afterhours report regarding a one-year-old child who had consumed several pills and was en route to the hospital. Law enforcement initiated a criminal investigation regarding the child's injuries. The child presented signs of possible respiratory failure, possible seizure activity, and potential toxic drug ingestion. Due to the child's presenting symptoms, she was transported to another hospital.

The mother reported on this day she fed her three children and put the one-year-old child down for a nap as she appeared tired. The mother stated she then cleaned the living room and found some pills on the floor. The mother stated the pills were "popped out" of the container and she "freaked out" and started to search for the pills. The mother reported she then went into the child's sibling's bedroom and asked the sibling if she had taken the pills. The mother stated the sibling did not respond, so the mother went back out into the living room to search for the pills. The mother reported her parents and younger brother then arrived at her home for a visit. The mother stated her younger brother went to check on the child, came back out into the living room, and stated that the child was not breathing right and something was wrong with the child. The mother reported she then picked up the child and her eyes were open, but she was not responding to the mother. The mother then stated she called emergency responders. The mother stated the medication belonged to a friend who had been residing at her residence that week.

No criminal charges have been filed in this case, but the investigation remains open.

Findings by agency, including maltreatment determination and material circumstances leading to incident:

The agency collaborated with law enforcement and medical personnel to complete the assessment. The Initial Assessment completed by the agency found a preponderance of the evidence to substantiate maltreatment of neglect to the child by her mother. The mother failed to provide the necessary supervision for her three children. The mother was aware there was medication scattered on the floor that was accessible to the children; however, she failed to secure the medication. The Initial Assessment completed by the agency found insufficient evidence to substantiate physical abuse of the three children by the father. The child was deemed unsafe with the mother and taken into Temporary Physical Custody. The child's two siblings, ages three-years-old and two-years-old, were also deemed unsafe with the mother, taken into Temporary Physical Custody, and placed with relatives. A Child in Need of Protection or Services petition was filed and the case remained open to provide ongoing case management services.
